## **The UK's Prime Minister is Expected to Announce the Recognition of a Palestinian State**

In July the Prime Minister Keir Starmer demanded that the Israeli Leadership meet several conditions including a Ceasefire in the Gaza Strip. The Israeli Leadership ruled this out since the start of the war.

Following this the PM announced they would shift their position regarding the conflict and recognise the Palestinian State, the PM's move got criticised by the Israeli Government and far right Conservatives as a "Reward for Terror".

## Nvidia to invest \$5 billion in struggling rival Intel

Nvidia, announced that it's investing \$5 billion in Intel and will collaborate with the struggling company.

Nvidia CEO Jensen Huang called it “a fusion of two world-class platforms” that combines Intel’s strength in making CPUs, that power most laptops, with Nvidia’s focus on the specialized graphics chips that are critical for artificial intelligence.

## DeCorpo Tip #1: Alternative to Microsoft Office

If you ever need to create a Presentation, a Text Document or a Math Sheet you might know that the Microsoft Suite is almost always the Best option, and its old competitor OpenOffice is pretty much dead.

Luckily LibreOffice Exists a full Office Suite with Regular Updates and a large community that can help you on the Forums.

Go visit <https://www.libreoffice.org/> and give it a spin!

# Video Game Review #1: Lethal Company

---{ Graphics }---

☒ Beautiful

The Graphics in Lethal Company are a Beautiful Mix of Retro Style Graphics and Modern Effects such as Volumetric Fog, the Game renders at a very low Resolution which makes it very performant.

---{ Gameplay }---

☒ Very good

The Gameplay Involves repeating a very “simple” task over and over again, its almost like being a REPO\* man *cough cough*. Of course it gets wildly spiced up when a Monster kills all of your friends and you’re running for your life to the ship with 20 seconds left before the Autopilot leaves you behind.

\*There is a Game Called R.E.P.O which is Inspired by Lethal Company and Involves very Similar Gameplay

---{ Audio }---

☒ Eargasm

The Sound design is brilliant, every ambient sound is super scary, the monsters sound real and the music is amazing aswell, this paired with the Brilliant voice chat makes it genuinely nice to listen to.

---{ PC Requirements }---

☒ Potato

Due to the ridiculously low render resolution this game should run on any computer, even a work laptop.

---{ Game Size }---

☒ Old Fashioned

The game is a Measly 1.4GB

---{ Difficulty }---

☒ Easy to learn / Hard to master

The Controls are easy to grasp but being good and consistently reaching your quota requires a lot of skill.

The hardest part for many (not for me, I’m a programmer. Checkmate) is using the ships terminal where you need to manually type all the commands like a 80s computer, and besides a “help” command you’re on your own.

---{ Grind }---

☒ Average grind level

You can grind to get better gear and unlock more expensive locations but you really don't have to.

---{ Story }---

☒ Some lore

The Game has small amounts of Lore in the form of Environmental Storytelling and notes you can find but they serve mostly as a substitute to learn about enemy behaviour.

---{ Game Time }---

☒ To infinity and beyond

You can play this game Indefinitely, there is no finishing this game and if you get bored you'll come back a few weeks later, trust me.

---{ Price }---

☒ Worth the price

For just 10 EUR this game is Definitely Worth every penny!

---{ Bugs }---

☒ Minor bugs

There is Minor bugs, especially the ragdolled corpses are a little buggy but the game is pretty polished overall.

---{ 10 / 10 }---

Overall the game gets a solid 10/10 and is seriously impressive for just one developer.
